

Maine Comprehensive School Counseling Program Model K-12

Developed by Maine School Counselors
In Cooperation with the Maine State
Department of Education

Dear Maine School Counselors,

Creating a Maine State Model has been a labor of love from several K-12 school counselors from across the state. This work is their gift to you and the students you serve. It is hoped that you will find this a very useful tool that will actively guide your program from design to implementation to evaluation.

The authority for undertaking this work comes from Chapter 125: Basic Approval Standards: Public Schools and School Administrative Units. This rule states that "Each school administrative unit shall have a Comprehensive Guidance Program, including guidance and counseling services, available to all students in grades K-12. This program shall be a component of the Comprehensive Education Plan which is to be implemented by the end of the 2006-2007 school year". (The full text of section 9.02 Comprehensive Guidance Resources of Chapter 125 is included in the appendix.)

The school counseling program facilitates student development in three broad domains: academic, career and personal/social, to promote and enhance the learning process.

Maine Learning Result Standards have been cross-walked with the ASCA National Model to bring a solid foundation to a counseling program. The ASCA National Model *A Framework for School Counseling Programs* (developed by the American School Counselor Association) is based on theory, practice and writings from leaders in the field of counseling.

We encourage you to add to this work the needs of your local community to round out the local, state, and national perspective of what a comprehensive K-12 School Counseling Guidance Program needs to be.

Thank you for the great work that you do every day for K-12 students in Maine. With your support EACH student will have the tools that they need to be a successful contributing member of the community they live and work in.

Again, special thanks to those who worked so hard to bring this model to you: Kate Clough, Karin Congleton, Laurie Hall, David Hanc, Martin Lynch, Elena Perrello, Tanya Reed, and Tim Walker. Credit also is given to the work of school counselors from the states of Connecticut, Iowa, and Utah from whose models we borrowed ideas.

Sincerely,

Shelley Reed

What is a School Counseling Program?

I. Developmental in Nature

- A. School Counselors design programs and services to meet the needs of students at various growth and developmental stages. The Maine Model based on the American School Counselor Association National Standards, defines what students should know and be able to do as a result of participating in a school counseling program.
- B. The standards for academic development guide the school counseling program to implement strategies and activities to support and maximize student learning. Academic development includes acquiring attitudes, knowledge and skills that contribute to effective learning in school and across the life span.
- C. The standards for career development guide the school counseling program to provide the foundation for the acquisition of skills, attitudes and knowledge enabling students to make a successful transition from school to the world of work and from job to job across the life span. Career development includes the employment of strategies to achieve future career success and job satisfaction as well as fostering understanding of the relationship between personal qualities, education and training and the world of work.
- D. The standards for personal/social development guide the school counseling program to provide the foundation for personal social growth as students progress through school and into adulthood. Personal/social development includes the acquisition of skills, attitudes and knowledge that help students understand and respect self and others, acquire effective interpersonal skills, understand safety and survival skills and develop into contributing members of our society.
- E. As specialists in child and adolescent development, school counselors coordinate the objectives, strategies and activities of a developmental school counseling program.

II. Integral Part of the Total Educational Program

- A. The Maine Model for School Counseling Programs supports the school's academic mission by promoting and enhancing the learning process for all students through an integration of academic, career and personal/social development.
- B. School counselors are specially trained educators in a position to call attention to situations within the schools that defeat, frustrate and hinder students' academic success.
- C. School counselors are aware of the data identifying patterns of achievement and behaviors affecting student success. They provide the leadership to assess school needs, to identify issues and to collaborate with others to develop solutions.

III. Designs a Delivery System

The Maine Model uses four components in the systematic delivery of the program.

- A. The curriculum component provides a method by which every student receives school guidance curriculum content in a systematic way.
- B. The individual student-planning component provides all students as an opportunity to work closely with their parents or guardians to plan and monitor their growth and development and take action on their next steps personally, educationally and occupationally.
- C. The responsive services component responds to the direct, immediate concerns of students and includes, but is not limited to, individual counseling, crisis counseling, referrals and consultations with parents or guardian, teachers, or others specialists.
- D. The system support component enables the school counseling process to be effective through: leadership, advocacy, consultation, collaboration, program management and professional development.

IV. Implemented by a State-Credentialed School Counselor

- A. School counselors in Maine are credentialed by the state, and possess a master's degree.
- B. School counselors need to receive training in student learning styles, classroom behavioral management, curriculum and instruction, student assessment and student achievement.

V. Conducted in Collaboration

- A. Professional school counselors work collaboratively with parents or guardians, community members, school personnel, and other support services professionals as part of the support services team for students.
- B. This team identifies student needs and makes referrals to appropriate resources both within and outside of the school.

VI. Monitors Student Progress

- A. Counselors are expected to consistently monitor academic progress and achievement.
- B. Monitoring is the process of reviewing data to determine if a student or group of students is demonstrating the desired results as delineated in the program goals and related student competencies.

VII. Driven by Data

- A. School counseling programs are data driven.
- B. Data create a picture of student needs and provide an accountable way to align the school counseling program.
- C. Process data tells what services are actually provided, and is accompanied by results data which answers the question, "so what?"
- D. It is important to disaggregate data by variables such as gender, ethnicity or socio-economic status, to examine various student groups.

VIII. Seeks Improvement

- A. The purpose of evaluation is to improve programs and services.
- B. School counselors measure results to determine what is working and what is not working to evaluate the program and make necessary adjustments.

IX. Share Successes

- A. School counselors share their program successes. Informed stakeholders know and promote the value of school counselors in children's lives.
- B. School counselors market and share the results of successful programs.

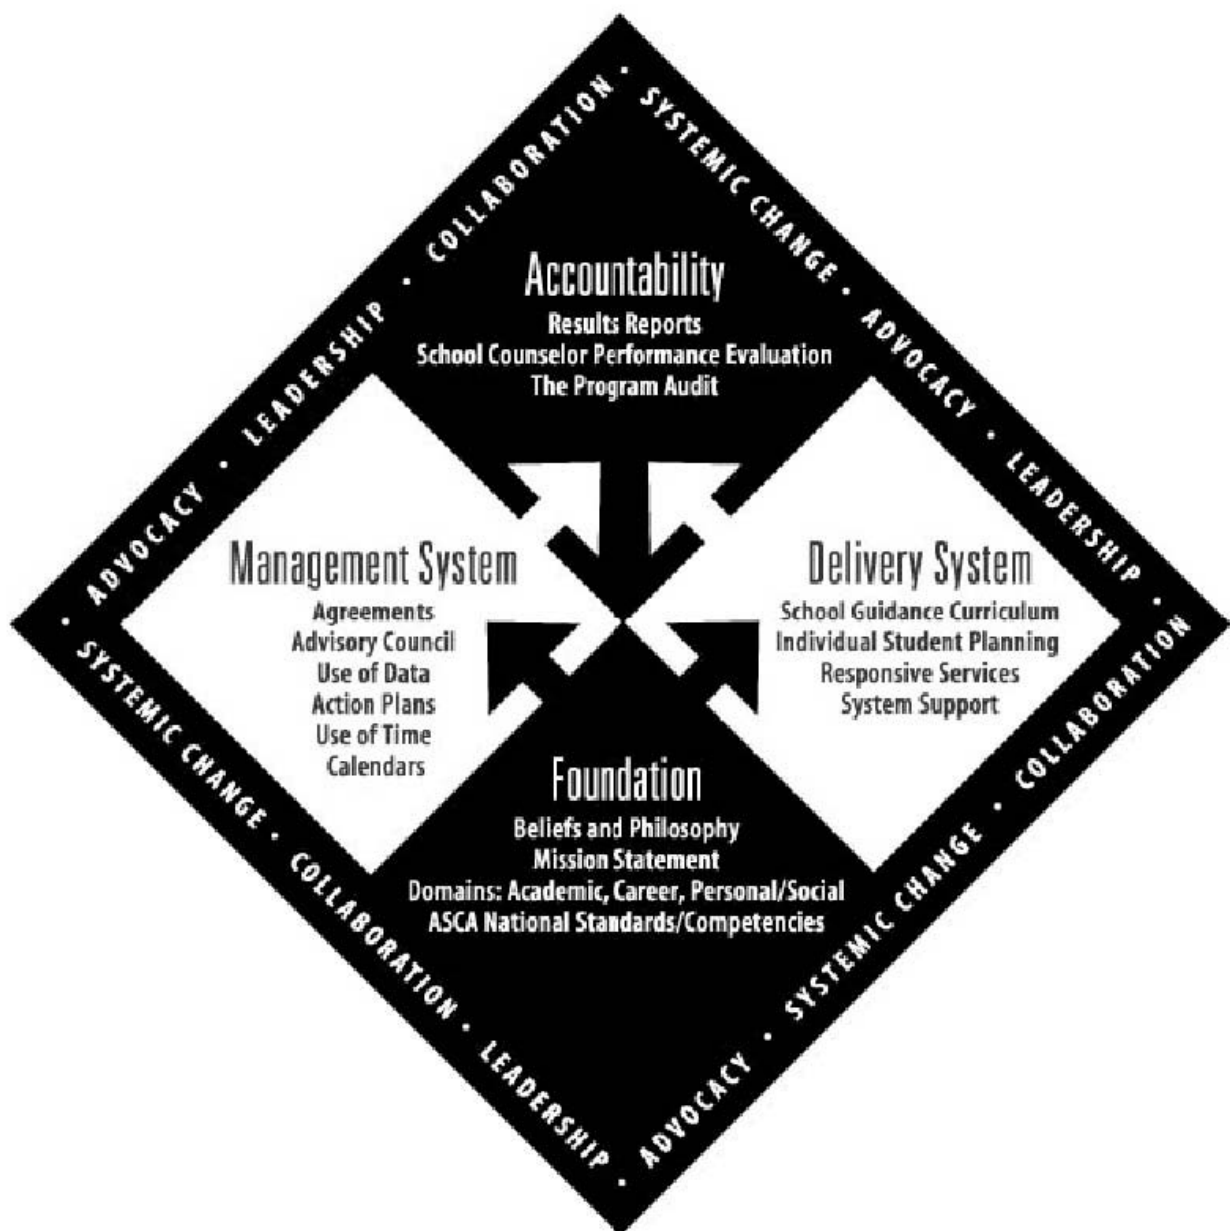

Chapter 2

Components of a School Counseling Model

Maine Comprehensive School Counseling Program Model K-12

Components of a School Counseling Program

ASCA National Model

Components of the Maine School Counseling Model

- I. **Foundation** - The foundation of the program describes what every student will know and be able to do.
 - A. **Belief and Philosophy:** The philosophy is a set of principles that guides the program development, implementation and evaluation.
 - B. **Mission:** A mission statement describes the program's purpose and provides the vision of what is desired for every student.
 - C. **Domains:** Domains are the extension of the mission and focus on the results students will achieve by the time the student graduates. The Maine Model combines domains of the American School Counselor Association and the Maine Learning Results facilitating development in the areas of academic, career and personal/social development.
- II. **Delivery System**- The delivery system states how the program will be implemented.
 - A. **Guidance Curriculum:** This curriculum is a developmental structured lesson approach for all K-12 students to develop knowledge and skills appropriate to their age and grade level.
 - B. **Individual Student Planning:** Individual planning is designed to help students establish personal goals and develop future plans through ongoing systemic planning.
 - C. **Responsive Services:** Students' immediate needs are met through responsive services such as counseling, consultation, referral, peer mediation, information gathering and coordination.
 - D. **Systems Support:** The purpose of these activities is to establish, maintain and enhance the school counseling program. These activities include: consultation, collaboration and teaming, professional development and program management.
- III. **Management Systems**- The Management System tells when, why and on what authority the program will be implemented.
 - A. **Use of Time:** A comprehensive school counseling program requires a counselor's time to be spent on direct service and eliminates non-school-counseling tasks. Establishing a calendar of activities and curriculum delivery will assist students, parents, staff and administrators in acknowledging the program.
 - B. **Management Agreements:** Statements of agreement between the counselor and the administrator clearly outline areas of responsibility to which a counselor is responsible for the year.
 - C. **Advisory Council:** The role of an advisory council is to review guidance program results and to make recommendations. This group is made up of students, school personnel, parents, and community members.

- D. Use of Data: School counselors must show that each activity implemented is based on a careful analysis of students' needs, achievement and related data. Data is necessary to determine where the school-counseling program is now, where it should be and where it is going. As pieces of data are analyzed gaps will be identified to adjust to the current population of students.
- E. Action Plans: Action plans that strategies are in place for programming to meet the needs of every student. Guidance curriculum action plans include: the domain, standard and competency addressed, description of guidance lesson activity, curriculum or materials to be used, time activity takes to complete, the person responsible for program delivery, and the means of evaluating student success.

IV. Accountability - The accountability system answers the question, "How are students different as a result of the school counseling program"?

- A. Results Reports: Reports which include process, perception and results data ensure that the work has been done and evaluated for effectiveness and the counseling program has been adjusted as needed.
- B. School Counselor Performance Standards: The school counselor's performance evaluation should be based on standards of good practice. These performance standards serve as a basis for self-evaluation and counselor evaluation.
- C. Program Audit: The primary purpose of a program audit is to collect information to guide future action within the program to improve future results for students.

Chapter 3

Philosophy and Mission Statement

Maine Comprehensive School Counseling Program Model K-12

Philosophy and Mission Statement

I. Philosophy

The Philosophy is an agreed upon set of beliefs and values the district follows when developing the mission statement and implementing the school counseling program.

A philosophy answers the questions:

1. What do we believe about the purpose of school counseling?
2. How are counseling and guidance connected to the educational goals of the district/school?
3. Who benefits from school counseling programs?
4. What are the competencies that students will acquire as a result of their participation in the school-counseling program?

Sample: "Guidance services are predicated on the understanding that each student is a unique, developing, capable individual who will learn from experience and grow personally, socially and educationally throughout adolescence. Respectful of individual differences, the program assists and supports students as they begin to understand themselves, develop decision-making and problem solving skills, and plan for the future. In addition to disseminating necessary and important educational and career information, the program seeks to promote each student's desire to maximize his/her potential in preparation for success in further education or a career. Counseling promotes effective communication and life planning skills that help students grow into responsible adults." (Connecticut Comprehensive School Counseling Program)

II. Mission Statement:

"One of the essential aspects of the foundation for a school counseling program is the mission statement. In the early development of the school counseling program, it is critical to determine a mission statement that gives overall direction and vision to the program. The statement should be specific, concise, and clear as to the intent of the school counseling program. A solid connection must be established with the educational mission statement." (Connecticut Comprehensive School Counseling Program)

The mission statement content should:

1. Be written with students as the primary clients
2. Advocate for the equity, access and success of every student
3. Be written for every student
4. Indicate the content and competencies to be learned

5. Show linkages with the school, school district or state department of education mission statements
6. Indicate the long-range results desired for all students

Sample: "Our mission is to provide a comprehensive school counseling program that promotes the academic, career and personal/social development of all students and assists students in acquiring competencies for life-long learning and success." (Westbrook School Counseling Program)

Chapter 4

Program Management

Maine Comprehensive School Counseling Program Model K-12

Program Management

The management section describes organizational processes needed to manage a school counseling program effectively and efficiently. This section describes the following:

- *First steps: Collecting local component information through a needs assessment helps to determine the needs of the school district through whose lens the program will be built.*
- *Managing the when: Use of Time and Calendars helps to define counseling tasks and identifies program priorities and how to coordinate counseling services with the school calendar.*
- *Managing the who and on what Authority: Management agreements and advisory councils advise and support the counseling program becoming effective tools for building excellent programs.*

Comprehensive Counselor Guidance Plan Step One: Collecting Local Component Information

"Local needs assessment come in many forms, and when organized they can provide valuable information. Generally a needs assessment is a formal or informal survey in which respondents indicate their concerns, needs, and interests." (Schmidt 1993)

"Use data from surveys, parents or guardians and students to identify needs. Use school achievement and related data including attendance, dropout rates, graduation rates, college attendance rates". (ASCA National Model)

"The results may be used to establish priorities and to eliminate or create services as suggested by the needs analysis." (Connecticut Comprehensive School Counseling Program)

"From needs assessment results and other data counselors develop objectives, competencies, priorities, and desired outcomes. Needs assessment data guides counselors in formulating program goals, and assessment data provides a basis for evaluation of programs." (Cite Russo 1989, Gyseberg & Henderson 2000, Lamp et al 2001, VanZant & Hayslip)

Conducting a needs assessment should be an ongoing process every 3 to 5 years.

Ways to Gather Information Include:

- Survey - Parents, Staff, Students & Community
- Focus Groups
- Interviews
- Town/Community Meetings
- On line Web Questionnaire/Survey
- Advisor/Advisee Groups
- Parent Organization

Tips:

- Have a balanced questionnaire across domains of academic, career and personal/social
- Remember to collect information anonymously
- Make sure that it is easy to score
- Use a 4-point scale which allows no middle ground, some researchers prefer the 5 point scale
- Use age appropriate methods of choice
- Have a peer edit process for evaluating the questions asked on the survey
- Follow administrative guidelines for data/collection survey
- Consider random sampling such as selecting every 5th name. Double check for factors like gender and economic status

Cautions in Developing the Needs Assessment:

- Include only items that you are willing and able to deliver
- Phrase items in terms of "student competencies" instead of counselor functions
- Use a statistically acceptable means of sampling
- Solicit help (if needed) to analyze results and draw statistically valid conclusions from data
- Keep surveys simple to understand and complete in order to promote a high return rate
- Design the needs assessment instrument to give you the types of information needed for change
- Pilot the instrument with a sample to test it for comprehension
- If the population is small, try to assess everyone. If under 500, try for at least a 20% return
- Consider the use of computer or scan scoring of data
- Make sure all communications are attractive and professional in appearance

Areas to Include on Needs Assessment:

A. Academic

- Ability to apply time-management and task-management skills
- Apply the study skills necessary for academic success at each level
- Understand the relationship between learning and work

B. Career

- Develop skills to locate, evaluate and interpret career information
- Develop an awareness of personal abilities, skills, interests and motivations
- Learn how to write a resume

C. Personal/Social

- Develop positive attitude towards self
- Use effective communication skills
- Develop coping skills for dealing with problems

Sample Needs Assessment

Local communities will want to design their own needs assessment to include additional items to adequately assess their particular situations. The Westbrook School Department K-5, 6-8, and 9-12 survey examples are one way of formatting a survey and addressing the ASCA and Maine Learning Results Standards.

Use of Time

How much time should school counselors spend delivering services in each component area? New counselors are often unsure. Although some experts assert that it doesn't matter as long as you obtain results for students (Johnson & Johnson, 1997), others maintain that sticking to suggested allocated time distribution does produce the required results. In "Developing and Managing Your School Guidance Program," by Norm Gysbers and Patricia Henderson (2000), the authors encourage school counselors to work with their departments to protect their time so that 80 percent of it is spent in direct service to students, staff and families and the remainder is spent in program management. The following percentages (See Figure 5.2) serve as a guide to school counselors and administrators when determining the time their program needs to spend in each of the four delivery system components.

Figure 5.2

Sample Distribution of Total School Counselor Time

Delivery System Component	Elementary School % of Time	Middle School % of Time	High School % of Time
Guidance Curriculum	35%-45%	25%-35%	15%-25%
Individual Student Planning	5%-10%	15%-25%	25%-35%
Responsive Services	30%-40%	30%-40%	25%-35%
System Support	10%-15%	10%-15%	15%-20%

Adapted from Gysbers, N.C. & Henderson, P. (Eds.) (2000). *Developing and managing your school guidance program*, (3rd ed.), Alexandria, VA: American Counseling Association.

As a first step to understanding your site's use of time, all the school counselors could keep track of their time and document activities performed throughout their days. This allows school counselors and administrators to determine the amount of time being spent in each of the delivery system components and in non-school-counseling activities. This is especially helpful when first designing the program because it serves to answer the question of "What is" and then provides a forum for the discussion of "What should be?"

In programs with more than one school counselor per site, there is often more flexibility between and among school counselors in determining how much time individual school counselors may spend in the delivery of system components. Keeping in mind that the program percentages are only suggested; the individual time a certain school counselor spends in the delivery of systemic services may vary depending on talents and expertise. School counselors with expertise in group counseling may focus delivering these services, while others may present more school guidance lessons. The time percentages are designed to be programmatic, not counselor specific. Counselors are encouraged to allot times based on program priorities and needs.

A conclusion may also be drawn from use of time information regarding how much time is currently being spent on counseling activities versus non school counseling activities. For example, in one school, 35 percent of the high school counselors' time was being spent on non-school-counseling

activities, which included master schedule building, clerical tasks and the counting and managing of the standardized tests. Following a presentation to district administrators on the results of a time analysis, the administrators decided, and the governing board supported, elimination of the non school counseling activities and hired school counseling assistants to help school counselors. Eliminating non school counseling activities and providing more clerical help freed school counselors to provide more direct services to students. Again, ASCA recommends school counselors spend a majority of their time in direct service to students.

Calendars

School counselors develop and publish a master calendar of school counseling events to ensure students, parents or guardians, teachers and administrators know what and when school counseling activities are scheduled and when and where activities will be held. Calendars also assist with planning, ensuring program participation.

The use of a school counseling program calendar aligned with the school site calendar facilitates staff, parents or guardians, student and community involvement as partners in students' education. The calendar establishes a site schedule for the school and counseling program activities. As the program grows and multiple activities are developed, a calendar validates the important support the school counselor program provides students, parents or guardians, teachers and administrators. A well developed calendar that is complete, timely and colorful can be a powerful public relations booster. Time and thought on how the calendar will be formatted, consistency in the timing and distribution methods, attractiveness of the design, color and detail produce a useful tool. An effective calendar invites others to acknowledge and participate in the school counseling program activities (Henderson & Gysbers, 1998; Johnson & Johnson, 2001; Myrick, 2003).

A school counseling program is balanced in two ways:

- In the delivery system (i.e. school guidance curriculum, individual student planning, responsive services and system support)
- In the use of time spent delivering the components

Calendars can:

- Identify grade levels, dates and activities
- Be published and distributed to appropriate persons: students, staff, parents or guardians and community
- Be posted on a weekly or monthly basis
- Be compared to locally established goals for time spent in the delivery of system components
- Be utilized to allocate time for data analysis and program evaluation
- Be used when designing and determining system priorities
- Be shared with the principal as an indicator of leadership, advocacy and foresight in the school counselor's professional approach

Annual Calendar

The yearly calendar is a way for school counselors to identify the school counseling program priorities and their commitment to them. Ideally, the calendar is located in several prominent places such as the department bulletin board, school or student bulletin boards, classroom bulletin boards, administrative offices, parent or guardian center, career center, student store and other sites used to communicate school events. It may also be submitted to the local newspaper, the student newspaper and the school counseling department's website to increase the program's visibility. The student support calendar might include relevant school activities for families, such as back to school night, open house, parents or guardian-teacher meetings, standardized tests dates, parents or guardian, student and teacher conferences, planned school counseling classroom lessons, career or college nights, evening meetings for reviewing study skills or other opportunities provided through the school and the community, as well as the student support program.

Many schools provide a yearly schedule of school activities that can be coordinated with other events with all relevant dates and times noted on the student support calendar. The school counseling program calendar:

- Increases visibility of the student support program and other related educational activities
- Provides focus on events or activities of value for the students, parents or guardians and staff
- Increases communication within the school and home about schedules and program activities
- Encourages the student, family, department and school to plan ahead for important student support functions
- Establishes an organizational pattern of highlighting and valuing student support opportunities
- Reserves the use of the facility hosting the events or activities
- Reinforces the importance of student participation in student support related activities

Monthly Calendar

The monthly calendar is maintained and circulated to highlight the specific activities and events for each month throughout the school year and into the summer. Print the monthly calendar in a distinctive color and distribute it to all teachers for their classroom bulletin boards. Be sure to remind teachers that they are invited to participate and to encourage student participation or observance of upcoming events.

Mail the calendar to parents or guardians as well. Schedule classroom guidance lessons on a monthly basis, such as one grade level per month for four to six lessons.

The Weekly Calendar

The weekly calendar is not a master schedule but a fluid road map that is somewhat flexible due to crisis or immediate student needs. In addition to classroom lessons, group counseling and individual planning, build in data analysis, collaboration and advocacy into the schedule to allow for some flexibility.

Management Agreements

Management agreements within the school counseling program ensure effective implementation of the delivery systems to meet students' needs. The entire school counseling staff, including the administrator in charge of school counseling, must make management decisions based on site needs and data analysis. Site principals and administrators must be involved in this important process.

When implementing a comprehensive school counseling program, management system decisions and agreements must be made regarding the organization and assignment of counselors (Johnson & Johnson, 2001). This should be accomplished in consultation with the principal or school counseling administrator prior to the next step in program implementation. It is recommended that:

- The school counseling team members and administrator review and discuss data-driven needs for the student population and school site based on data analysis.
- The school counseling team decides on a plan of action to meet student needs.
- The school counseling team and administrator agree on how students, guidance curriculum and services will be assigned to specific counselors.
- The school counseling team produces and presents yearly a draft of the management agreement.
- The administrator reviews the management agreement and arrives at consensus with the school counseling team.

Program implementation is predicated on integrating all elements of the school counseling program. (See sample management agreements in the Appendix) Organizational plans should include consideration of the following:

- How will students be assigned to school counselors to ensure every student has access to the program and acquires the pre-determined competencies? By grade level, alpha breakdown, standards domain, academy or pathway, see any counselor or a combination?
- Will counselors chose to specialize in different areas? Who will provide responsive services while other counselors are delivering the scheduled school guidance curriculum? Will the school site implement a "counselor of the day" program so there is always one school counselor available for crisis when others are delivering guidance curriculum?
- What amount of time should be spent in delivering guidance lessons, providing individual student planning, delivering responsive services and managing system support?
- Who is responsible for implementation of the various services and specialty tasks?
- How will counselors be compensated for work beyond the regular work day?
What budget is available to purchase the necessary materials and supplies to implement the program?
- What professional development is needed to support the school counselor or team's ability to provide a comprehensive school counseling program?
- How often should the school counseling department meet as a team, with administration, with school staff and with the advisory council?
- Who determines how support services for the counseling team will be provided and organized? What role do school counseling assistants, registrars, clerks and volunteers play on the counseling team?

When school counselors and administrators meet and agree on program priorities, implementation strategies and the organization of the counseling department, the entire program runs more smoothly and is more likely to produce the desired results for students.

Advisory Council

An advisory council is a representative group of persons appointed to both advise and assist the school counseling program within a school district. The advisory council reviews the program goals, competencies and results and participates in making recommendations to the school counseling department, principal and superintendent (Johnson & Johnson, 2001). Ideally, advisory council membership reflects the community's diversity. It should include representative stakeholders of the school counseling program: students, parents or guardians, teachers, counselors, administrators, school board members, business and community members. The council should meet twice a year at a minimum.

Advisory council functions can vary. The area of specialization, number of years an educational program has been in existence, program size, community needs and other important items all affect the advisory council's functions. School counselors use data to analyze overall program effectiveness and to make decisions regarding changes in program content and delivery. The advisory council members, using their background and expertise, provide support, input and recommendations for program development and improvement throughout the process. The advisory council, therefore, can be an effective tool to help build an excellent school counseling program. Like any tool, it must be adequately maintained and used properly.

Setting up an Advisory Council

When creating an advisory council, the school counselor must consider two things: stakeholder representation and group size. The advisory council truly represents the school's stakeholders. The broader the representation on the advisory council, the more the group's work will accurately reflect the community's values, concerns, etc. Although broad representation is crucial, the council's size also is an issue. It is important to create an environment that is conducive to informed, constructive discussion. A council with too many members may be ineffective. Generally, a good rule of thumb is to establish a council with a minimum of eight members and a maximum of 20 members. The first step in forming a viable council is selecting good candidates for membership. The council must be able to function as a communications link between the school counseling program and the various groups to be served: students, parents or guardians, educators, business and the community.

Chapter 5

Accountability

Maine Comprehensive School Counseling Program Model K-12

Accountability System

I. Results Reports

- A. Results reports help answer the question, "How are students different as a result of the program?"
- B. Data is collected at three different intervals:
 - 1. Short-term data: provide an immediate evaluation of the activity process on student behavior or student learning
 - 2. Intermediate data: data collection occurs over a longer period of time as a benchmark or indication of the progress toward the goal
 - 3. Long-term data: data collection occurs over an extended period of time and measures the activity's overall results for students
- C. Results reports serve as a tool for:
 - 1. Ensuring the program was carried out as planned
 - 2. Ensuring every student was served
 - 3. Ensuring developmentally appropriate materials were used
 - 4. Documenting the program's process, perception and results data
 - 5. Documenting the program's immediate, intermediate and long-range impact
 - 6. Analyzing the program's effectiveness
 - 7. Sharing the program's success
 - 8. Advocating for systematic change in the school system
- D. Results reports may include the following:
 - 1. The grade level served
 - 2. Lesson content areas
 - 3. Curriculum or materials used
 - 4. Process data such as the number of school counseling lessons delivered and in what subject area
 - 5. Process data such as the number of students served
 - 6. Short-term perception data such as pre-post tests of knowledge gained
 - 7. Intermediate and long-term results data such as the impact on behavior, attendance or achievement
 - 8. The implications of the results on the counseling program

II. Impact Of The School Counseling Program Over Time

- A. Comparing data over time offers long-term information reflecting trends in student improvement or areas of concern, which become areas for improvement
- B. The impact-over-time form serves as a summary sheet listing baseline and change data over time and gives the counseling staff a tool to review overall student progress
Documenting baseline data prior to programmatic restructuring provides ready, necessary information for data-based decision making

- C. The impact-over-time-form minimally contains the following:
1. Student demographics: Enrollment data, gender, ethnicity, grade levels and languages
 2. Academic achievement: Standardized test scores, grade-point averages, dropout rates, graduation rates
 3. Career development: Students enrolled in work experience, job shadowing
 4. Personal/social development: Climate survey results, substance abuse and abuse statistics attendance data and suspension and expulsion data
 5. Parents or guardian involvement: Parent or guardian attendance at evening activities, parent workshops and conferences

III. School Counselor Performance Standards

- A. School counselor performance standards align with the ASCA National Model and contain basic standards of practice expected from counselors

Standard 1: The professional school counselor plans, organizes and delivers the school counseling program.

Standard 2: The professional school counselor implements the school guidance curriculum through the use of effective instructional skills and careful planning of structured group sessions for all students.

Standard 3: The professional school counselor implements the individual planning component by guiding individuals and groups of students and their parents or guardians through the development of educational and career plans.

Standard 4: The professional school counselor provides responsive services through the effective use of individual and small-group counseling, consultation and referral skills.

Standard 5: The professional school counselor provides system support through effective school counseling program management and support for other educational programs.

Standard 6: The professional school counselor discusses the counseling department management system and the program action plans with the school administrator.

Standard 7: The professional school counselor is responsible for establishing and convening an advisory council for the school counseling program.

Standard 8: The professional school counselor collects and analyzes data to guide program direction and emphasis.

Standard 9: The professional school counselor monitors the students on a regular basis as they progress in school.

Standard 10: The professional school counselor uses time and calendars to implement an efficient program.

Standard 11: The professional school counselor develops a results evaluation for the program.

Standard 12: The professional school counselor conducts a yearly program audit.

Standard 13: The professional school counselor is a student advocate, leader, collaborator, and a systems change agent.

IV. The Program Audit

- A. The audit is a tool aiding school counselors in the breakdown and analysis of each program component
- B. Once completed, the audit indicates implementation areas that will be improved or enhanced
- C. The audit provides evidence of the program's alignment with *ASCA's National Model for School Counseling Programs*
- D. After completing the audit, analyze responses to determine the following:
 - 1. Major strengths of program
 - 2. Items in greatest need of strengthening
 - 3. Short-range goals for improvement
 - 4. Long-range goals for improvement

Evaluation and Assessment

Program Evaluation

Program Evaluation

It is important that school counselors use data to show program effectiveness. To evaluate the impact of the counseling program process, perception and results data should be collected to show immediate and long term effectiveness.

Process Data

Process data answers the question, "What did you do for whom?"

Examples include:

Held six five-session counseling groups with eight students each on anger management.
1,350 9th grade students attended a substance abuse prevention workshop day.

Perception Data

Perception data answers the question, "What do people think they know, or believe or can do?" These data measure knowledge gained attitudes and beliefs, competencies achieved. This is often collected through pre-post surveys, tests or skill demonstration, presentation, role play, data, evaluation forms.

Examples include:

- Competency- 100 percent of students in grades 9-12 have completed an academic plan.
- Knowledge- 92 percent of students can identify the early warning signs of violence.
- Attitudes or beliefs-29 percent of students report feeling safe at school.

Results Data

Results data answers the "So what"? question. These data show that your program has had a positive effect on students' ability to utilize their knowledge, attitudes and skills to effect behavior change. Data sources are attendance rates, number of discipline referrals, graduation and dropout rates, grade point averages.

Examples include:

- Graduation rates improved by 14 percent.
- Discipline referrals decreased by 20 percent.

Data over Time

To get a true picture of the impact of a school counselor program data needs to be collected for an immediate snapshot and then intermediate and long range time frames.

Immediate data on pre-post tests show a change in knowledge, skills and attitudes. Intermediate data shows progress over a brief time period such as improved grades through use of study skills, improved class-room behavior after small group counseling. Long range data shows a year to year growth such as improved student attendance or graduation rates.

Data Management

Each school district should decide what is important to be monitored. Student database systems enhance a school counselor's ability to monitor every child's progress. Tools for this include student education records and career portfolios.

Closing the Gap

Quality teachers know that not all students learn in the same way or at the same speed. Through the analysis of disaggregated data, they discover which groups of students need additional help and design innovations specifically geared towards those students' needs.

In the same way, school counselors know that not all students come to school with equal academic and person/social resources. Analyzing disaggregated data also uncovers equity and access issues. Once the problem areas are brought to light, it is important to thoughtfully consider those factors which are creating barriers in those areas. School counselors then strategically design programs or activities to help lessen the barriers and begin to close the gap. The results of these interventions can be documented with student-achievement and achievement -related data. These types of program results move school counseling from the periphery of the school's mission to a position where the educational community views it as critical to student success.

Chapter 10

Use of Data

Maine Comprehensive School Counseling Program Model K-12

Use of Data

The use of data to effect change within the school system is integral to ensuring that every student receives the benefits of the school counseling program. School counselors must show that each activity implemented as part of the school counseling program was developed from a careful analysis of student needs, achievement and related data.

- I. Data provides useful information for many purposes
 - A. Concretely demonstrates accountability and progress toward goals
 - B. Monitors student progress
 - C. Creates an urgency for change
 - D. Serves as a catalyst for focused action
 - E. Engages decision-makers, district leaders, and school teams in data driven
 - F. Challenges existing policies, practices, and attitudes
 - G. Exposes evidence of access and equity issues for focused advocacy and intervention
 - H. Focuses resources, programs, interventions and strategies where they are needed most
 - I. Supports grant proposals
- II. School counselors monitor student progress through three types of data: student-achievement data, achievement-related data, and standard-and competency-related data
 - A. Student-achievement data measure student academic progress in several fields
 - 1. Standardized test data
 - 2. Grade point average
 - 3. Graduation rate
 - 4. Dropout rates
 - B. Achievement-related data measure those fields research has shown to be correlated to academic achievement
 - 1. Course enrollment patterns
 - 2. Discipline referrals
 - 3. Attendance rates
 - C. Standards-and competency-related data measure mastery of ASCA National Standards, Maine's Learning Results and Guiding Principles
 - 1. Percentage of students with four-year plans on file
 - 2. Percentage of students who have set and attained academic goals
 - 3. Percentage of students who apply conflict resolution skills
- III. Disaggregate data separates data by variables to ensure equity of performance
 - A. Gender
 - B. Ethnicity
 - C. Socio-economic status
 - D. Vocational Programming
 - E. Language spoken at home

- F. Special Education Programming
- G. Grade level
- H. Teacher(s)

Chapter 125: BASIC APPROVAL STANDARDS: PUBLIC SCHOOLS AND SCHOOL ADMINISTRATIVE UNITS

SUMMARY: This rule establishes school approval standards governing the school administrative units and public schools of the state and adopts procedures for ascertaining compliance with all applicable legal requirements, as authorized by Title 20-A, Maine Revised Statutes, chapter 206.

9.02 Comprehensive Guidance Resources

A) Each school administrative unit shall have a Comprehensive Guidance Program, including guidance and counseling services, available to all students in grades K-12. The development of the program and the delivery of the services it describes shall be a coordinated effort of the members of the unit's professional staff.

The Comprehensive Guidance Program shall include services to be provided to students at each developmental stage and shall specify how the following services will be provided to all students:

- (1) A program of structured developmental experiences presented systematically through classroom and group activities to enhance the ability of students to meet the content standards of the system of Learning Results;
- (2) A program of activities and planned strategies to help individual students manage their career development, including present and future education consistent with the Career Preparation content standards and performance indicators identified in Me. Dept. of Ed. Reg. 131; and
- (3) Counseling and consultation services designed to respond to the immediate needs and concerns of students, parents, and staff.

B) Comprehensive Guidance Program Goals

The Comprehensive Guidance Program shall address the following goals:

- (1) Encourage parental involvement;
- (2) Raise student aspirations;
- (3) Provide information and appropriate referral sources to students, parents, staff; and
- (4) Provide management activities that establish, maintain, and enhance the program including research, evaluation, programming, supervision, staff training and development, and communications.

C) Implementation Timeline

Each school administrative unit shall include the Comprehensive Guidance Program in the unit's Comprehensive Education Plan, with this component of the plan to be implemented by the end of the 2006-2007 school year contingent upon funding of Essential Programs and Services or its equivalent.

Family Educational Rights and Privacy Act (FERPA)

The Family Educational Rights and Privacy Act (FERPA) (20 U.S.C. § 1232g; 34 CFR Part 99) is a Federal law that protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education.

FERPA gives parents certain rights with respect to their children's education records. These rights transfer to the student when he or she reaches the age of 18 or attends a school beyond the high school level. Students to whom the rights have transferred are "eligible students."

- Parents or eligible students have the right to inspect and review the student's education records maintained by the school. Schools are not required to provide copies of records unless, for reasons such as great distance, it is impossible for parents or eligible students to review the records. Schools may charge a fee for copies.
- Parents or eligible students have the right to request that a school correct records which they believe to be inaccurate or misleading. If the school decides not to amend the record, the parent or eligible student then has the right to a formal hearing. After the hearing, if the school still decides not to amend the record, the parent or eligible student has the right to place a statement with the record setting forth his or her view about the contested information.
- Generally, schools must have written permission from the parent or eligible student in order to release any information from a student's education record. However, FERPA allows schools to disclose those records, without consent, to the following parties or under the following conditions (34 CFR § 99.31):
 - School officials with legitimate educational interest;
 - Other schools to which a student is transferring;
 - Specified officials for audit or evaluation purposes;
 - Appropriate parties in connection with financial aid to a student;
 - Organizations conducting certain studies for or on behalf of the school;
 - Accrediting organizations;
 - To comply with a judicial order or lawfully issued subpoena;
 - Appropriate officials in cases of health and safety emergencies; and
 - State and local authorities, within a juvenile justice system, pursuant to specific State law.

Schools may disclose, without consent, "directory" information such as a student's name, address, telephone number, date and place of birth, honors and awards, and dates of attendance. However, schools must tell parents and eligible students about directory information and allow parents and eligible students a reasonable amount of time to request that the school not disclose directory information about them. Schools must notify parents and eligible students annually of their rights under FERPA. The actual means of notification (special letter, inclusion in a PTA bulletin, student handbook, or newspaper article) is left to the discretion of each school.

Part 3: Children

Chapter 1071: CHILD AND FAMILY SERVICES AND CHILD PROTECTION ACT

Subchapter 2: REPORTING OF ABUSE OR NEGLECT

§4015. Privileged or confidential communications

The husband-wife and physician and psychotherapist-patient privileges under the Maine Rules of Evidence and the confidential quality of communication under Title 16, section 53-B; Title 20-A, sections 4008 and 6001, to the extent allowed by applicable federal law; Title 24-A, section 4224; Title 32, sections 1092-A and 7005; and Title 34-B, section 1207, are abrogated in relation to required reporting, cooperating with the department or a guardian ad litem in an investigation or other child protective activity or giving evidence in a child protection proceeding. Information released to the department pursuant to this section must be kept confidential and may not be disclosed by the department except as provided in section 4008. [2001, c. 696, §22 (amd).]

Statements made to a licensed mental health professional in the course of counseling, therapy or evaluation where the privilege is abrogated under this section may not be used against the client in a criminal proceeding. Nothing in this section may limit any responsibilities of the professional pursuant to this Act. [2001, c. 696, §22 (amd).]

Title 20-A: EDUCATION

Part 3: ELEMENTARY AND SECONDARY EDUCATION

Chapter 201: GENERAL PROVISIONS

§4008. Privileged communications

1. Definitions. As used in this section, unless the context indicates otherwise, the following terms have the following meanings.

- A. "Client" means a person who has actively sought or is in the process of seeking professional help from a school counselor or school social worker. [1989, c. 396, §1 (amd).]
- B. "School counselor" means a person who is employed as a school counselor in a school setting and who:
 - (1) Is certified as a school counselor by the department; or
 - (2) Possesses a minimum of a master's degree in an approved program in guidance and counseling. [1981, c. 693, § 5, 8 (new).]
- C. "School social worker" means a person who is employed as a school social worker in a school setting and who:
 - (1) Is licensed as a social worker by the State Board of Social Worker Licensure; or
 - (2) Possesses a bachelor's degree and has been granted a conditional license from the State Board of Social Worker Licensure. [1989, c. 396, §2 (new).] [1989, c. 396, §§1,2 (amd).]

2. Privileged communication. A school counselor or school social worker may not be required, except as provided by this section, to divulge or release information gathered during a counseling relation with a client or with the parent, guardian or a person or agency having legal custody of a minor client. A counseling relation and the information resulting from it shall be kept confidential consistent with the professional obligations of the counselor or social worker. [1989, c. 396, §3 (amd).]

3. Exceptions. This section shall not apply to the extent that disclosure of information is necessary:

- A. To comply with Title 22, chapter 1071; and [1983, c. 781, §1 (amd).]
- B. To report to an appropriate authority or to take appropriate emergency measure when:
 - (1) The client's condition requires others to assume responsibility for the client; or
 - (2) There is clear and imminent danger to the client or others. [1983, c. 806, § 42 (amd).] [1983, c. 781, § 1 (amd); c. 806, § 42 (amd).]

Title 20-A: EDUCATION

Part 3: ELEMENTARY AND SECONDARY EDUCATION

Chapter 221: SCHOOL RECORDS, AUDITS AND REPORTS

Subchapter 1: STUDENT RECORDS

§6001. Dissemination of information

- 1. Federal and state law.** The provisions of this section, the United States Family Educational Rights and Privacy Act of 1974, Public Law 93-380, as amended by Public Law 93-568, and the United States Education of All Handicapped Children Act, Public Law 94-142 govern the dissemination of information about students, as well as written notices of intent to provide equivalent instruction through home instruction and all education records of students receiving equivalent instruction through home instruction. [2003, c. 181, §3 (amd).]
- 2. Internet restrictions.** A public school may not publish on the Internet or provide for publication on the Internet any personal information about its students without first obtaining the written approval of those students' parents. For the purpose of this section, "personal information" means information that identifies a student, including, but not limited to, the student's full name, photograph, personal biography, e-mail address, home address, date of birth, social security number and parents' names. [1999, c. 595, §2 (new).]
- 3. Dissemination of education records to criminal justice agencies.** A school may disseminate education records as defined in 20 United States Code, Section 1232 g(a)(4) regarding a juvenile if:
 - A. The juvenile has not been adjudicated as having committed a juvenile crime; [1999, c. 595, §2 (new).]
 - B. The education records are disseminated to:
 - (1) Criminal justice agencies; or
 - (2) Agencies that by court order or agreement of the juvenile are responsible for the health or welfare of the juvenile and that have provided the school with a statement describing the purpose of the dissemination; and [1999, c. 595, §2 (new).]
 - C. The education records are relevant to and disseminated for the purpose of creating or maintaining an individualized plan for the juvenile's rehabilitation. [1999, c. 595, §2 (new).]

Education records received under this subsection are confidential and may not be further disseminated, except to the court or as otherwise provided by law. The persons to whom the education records are disseminated shall certify in writing to the school that the records will not be disclosed to any other party, except the court or as otherwise provided by law, without the written consent of the juvenile or the juvenile's parent or guardian. [1999, c. 595, §2 (new).]

Chapter 221: SCHOOL RECORDS, AUDITS AND REPORTS

Subchapter 1: STUDENT RECORDS

§6001-A. Parental access to information on school activities

- 1. Parental notification.** Upon written request by a parent, a school administrative unit may provide written notification of all school activities and programs for which parental participation, involvement, notification or awareness is in the best interest of the student. A noncustodial parent may have access to information on school activities and programs upon written request and with the mutual agreement of the custodial parent and the school administrative unit. [1997, c. 415, §4 (new).]
- 2. Exemption.** This section does not apply to a parent denied parental rights and responsibilities in a court order. [1997, c. 415, §4 (new).]

Title 20-A: EDUCATION

Part 3: ELEMENTARY AND SECONDARY EDUCATION

Chapter 221: SCHOOL RECORDS, AUDITS AND REPORTS

Subchapter 1: STUDENT RECORDS

§6001-B. Transfer of education records

- 1. Education records must follow students who transfer.** Education records must follow students who transfer to a school in another school administrative unit in the State. The education records of students who transfer from educational programs or schools for juveniles located in or operated by correctional facilities or out-of-state schools are also subject to this requirement. [2001, c. 452, §14 (amd).]
- 2. Transfer of records.** Upon application of a student to transfer to another school administrative unit in this State or to enroll at a school administrative unit in this State from an educational program or school for juveniles located in or operated by a correctional facility or a school outside of the State, and upon the written request of the superintendent of the school administrative unit into which the student seeks admission, school administrators at the school administrative unit from which the student is transferring shall provide all of the student's education records, including disciplinary records, attendance records, health records other than confidential health records for which consent for dissemination has not been obtained and special education records, to school administrators at the school administrative unit to which the student is seeking a transfer. Confidential health records may be provided under this subsection only if the school administrator at the school administrative unit from which the student is transferring receives the authorization or consent necessary for the dissemination of information contained in the following records:
 - A. Records concerning information on a person's HIV infection status, including the results of an HIV test, as those records are described in Title 5, section 19203-D; [2003, c. 472, §1 (new).]
 - B. Records concerning information on a person's alcohol and other drug abuse treatment as those records are described in Title 5, section 20047; [2003, c. 472, §1 (new).]

- C. Records concerning information on a person's health care and treatment as those records are described in Title 22, section 1711-C; and [2003, c. 472, §1 (new).]
- D. Records concerning information on a person's mental health treatment as those records are described in Title 34-B, section 1207. [2003, c. 472, §1 (new).]
[2003, c. 472, §1 (amd).]

3. Determination of disciplinary status of student applying for transfer; discretion of school to accept student. At the request of the superintendent of the school administrative unit into which a student seeks admission, the student's current or former school administrators shall provide, in a timely fashion, an oral or written report to the receiving school administrative unit indicating whether the student has been expelled or suspended or is the subject of an expulsion or suspension proceeding. In the case of a student who has been expelled or suspended or is the subject of an expulsion or suspension proceeding, the receiving school administrative unit may deny admission or participation in public school programs, facilities or activities as part of an equivalent instruction program pursuant to section 5021 until the school administrative unit is satisfied that the conditions of the expulsion or suspension have been met. [1999, c. 351, §3 (new).]

3-A. Determination of status of juvenile applying for admission; discretion of school to accept juvenile. If the receiving school administrative unit receives information under Title 15, section 3308, subsection 7, paragraph B-1, subparagraph (3) and Title 34-A, section 1216, subsection 1, paragraph F that a student is not in compliance with a condition of an individualized plan for the juvenile's rehabilitation and that condition is relevant to the juvenile's reintegration into the school, the receiving school administrative unit may deny admission or participation in public school programs, facilities or activities as part of an equivalent instruction program pursuant to section 5021 until the school administrative unit is satisfied that the condition has been met. [2003, c. 205, §8 (amd).]

4. Notice to parents and guardians. Prior to the start of the 2000-01 school year and each school year thereafter, a school administrative unit shall send a written notice to parents or guardians of every student enrolled in the school administrative unit that education records must be sent to a school administrative unit to which a student applies for transfer. Beginning with the 2001-2002 school year, an educational program or school for juveniles located in or operated by a correctional facility shall send a written notice to parents, guardians and custodians of every student enrolled in that educational program or school for juveniles located in or operated by the correctional facility that education records must be sent to a school administrative unit to which a student applies for transfer. The notice provided to parents, guardians and custodians must comply with the standards of the federal Family Education Rights and Privacy Act of 1974, Public Law 93-380, as amended by Public Law 93-568. [2001, c. 452, §14 (amd).]

- 1. Immediate report.** Reports regarding abuse or neglect shall be made immediately by telephone to the department and shall be followed by a written report within 48 hours if requested by the department. [1979, c. 733, § 18 (new).]
- 2. Information required.** The reports shall include the following information if within the knowledge of the person reporting:
 - A. The name and address of the child and the persons responsible for his care or custody; [1979, c. 733, § 18 (new).]
 - B. The child's age and sex; [1979, c. 733, § 18 (new).]
 - C. The nature and extent of abuse or neglect, including a description of injuries and any explanation given for them; [1979, c. 733, § 18 (new).]
 - D. A description of sexual abuse or exploitation; [1979, c. 733, § 18 (new).]
 - E. Family composition and evidence of prior abuse or neglect of the child or his siblings; [1979, c. 733, § 18 (new).]
 - F. The source of the report, the person making the report, his occupation and where he can be contacted; [1979, c. 733, § 18 (new).]
 - G. The actions taken by the reporting source, including a description of photographs or x rays taken; and [1979, c. 733, § 18 (new).]
 - H. Any other information that the person making the report believes may be helpful. [1979, c. 733, § 18 (new).] [1979, c. 733, § 18 (new).]

§4014. Immunity from liability

1. **Reporting and proceedings.** A person, including an agent of the department, participating in good faith in reporting under this subchapter or participating in a related child protection investigation or proceeding, including, but not limited to, a multidisciplinary team, out-of-home abuse investigating team or other investigating or treatment team, is immune from any criminal or civil liability for the act of reporting or participating in the investigation or proceeding. Good faith does not include instances when a false report is made and the person knows the report is false. Nothing in this section may be construed to bar criminal or civil action regarding perjury or regarding the abuse or neglect which led to a report, investigation or proceeding. [1987, c. 395, Pt. A, § 89 (amd).]
2. **Photographs and x rays.** A person participating in good faith in taking photographs or x rays under this subchapter is immune from civil liability for invasion of privacy that might otherwise result from these actions. [1979, c. 733, § 18 (new).]
3. **Presumption of good faith.** In a proceeding regarding immunity from liability, there shall be a rebuttable presumption of good faith. [1979, c. 733, § 18 (new).]

05-071 MAINE STATE BOARD OF EDUCATION

Chapter 115: CERTIFICATION, AUTHORIZATION, AND APPROVAL OF EDUCATION PERSONNEL

SUMMARY: This rule contains the requirements for certification, authorization, and approval of educational personnel who serve in the public and in certain approved private schools of the State of Maine. Standards and procedures for certification, authorization, and approval are included and are intended to provide the highest quality of personnel to help students meet the standards of the system of Learning Results.

NOTE: All sections relating to administrator certificates are effective September 1, 2004. All other sections are effective August 1, 2005.

PART I: STANDARDS AND PROCEDURES FOR CERTIFICATION, AUTHORIZATION, AND APPROVAL

SECTION 1. *GENERAL PROVISIONS*

1.1 Introduction

The quality of education personnel is critically important to the successful implementation of the system of Learning Results for each Maine child. This rule governs the certification of teachers, educational specialists, and administrators; the authorization of educational technicians; and the approval of those serving in positions for which certification or authorization is not required. Pursuant to that end, this rule applies to Maine public schools and private schools that are approved in accordance with 20-A M.R.S.A. §2901(2)(B). Sections of the rule addressing approval of personnel also apply to private schools enrolling 60% or more students at public expense. This rule implements 20-A M.R.S.A. Chapter 502, and supersedes all previous rules on the same subject. Other rules relating to certification, authorization or approval include Me. Dept. of Ed. Reg. 013, Qualifying Examinations; Me. Dept. of Ed. Reg. 114, Purpose, Standards and Procedures for the Review and Approval of Educational Personnel Preparation Programs; Me. Dept. of Ed. Reg. 118, Support Systems: Standards and Procedures for Operation; and Me. Dept. of Ed. Reg. 119, Procedures for Denial, Non-renewal, Suspension, or Revocation of a Certificate, Endorsement, Authorization or Approval.

The establishment of certification, authorization, and approval standards and procedures for education personnel is the responsibility of the State Board of Education. The Commissioner of Education is responsible for implementing the certification, authorization, and approval process. Nothing in this rule shall preclude an employing school administrative unit or private school from establishing requirements in addition to those specified in this rule to meet local needs and expectations.

1.2 Scope of Requirements

A. Certification

1. Individuals who serve as teachers, educational specialists, or administrators shall be certified on or before the first day of service in a school and throughout their period of service.

2. It is the responsibility of an applicant for a professional position in a school to obtain a certificate appropriate to the assignment, to seek timely renewal of the certificate, and to meet certification standards.
3. It is the responsibility of the superintendent of a school administrative unit or the headmaster of an approved private school to ensure that every teacher, educational specialist, and administrator has an appropriate certificate on the first day of service and that appropriate certification is maintained throughout the period of service. Any employment contract offered to or made with a teacher, educational specialist, or administrator shall be contingent upon that individual's timely receipt of appropriate certification and the maintenance of appropriate certification throughout the contract term.
4. Teachers of children in federally funded programs shall hold a valid teacher certificate for the grade level at which they teach, and secondary teachers shall hold a subject area endorsement in at least one area for which they are responsible and shall meet all other federal criteria in each area for which they are responsible. All teachers in schools with school-wide programs shall hold provisional or professional certification.
5. Teachers of children in alternative education programs shall hold a valid teacher certificate for the grade level at which they teach, and secondary teachers shall hold a subject area endorsement in at least one area for which they are responsible and shall meet all other federal criteria in each area for which they are responsible.

B. Authorization

Educational technicians are not required to be certified, but shall meet the requirements for authorization in accordance with Section 10 of this rule.

C. Approval

Approval by the Department is required in accordance with Section 11 of this rule for:

1. Personnel serving in positions where certification or authorization is not required, including substitutes;
2. Individuals who provide educational or support services in the public schools through a contracted services arrangement; and
3. Individuals employed in private schools that enroll more than 60% of students at public expense, unless the individual holds certification or authorization.

1.3 Effective Date

The effective date of Part I and Part II of this rule for all sections regarding administrator certificates shall be September 1, 2004. The effective date of Part I and Part II of this rule for all sections other than administrator certificates shall be August 1, 2005.

Why Elementary School Counselors

Today's young people are living in an exciting time, with an increasingly diverse society, new technologies and expanding opportunities. To help ensure that they are prepared to become the next generation of parents, workers, leaders and citizens, every student needs support, guidance and opportunities during childhood, a time of rapid growth and change. Children face unique and diverse challenges, both personally and developmentally, that have an impact on academic achievement. "Toward a Blueprint for Youth: Making Positive Youth Development a National Priority", U.S. Department of Health and Human Services

Elementary School Students' Developmental Needs

The elementary years are a time when students begin to develop their academic self-concept and their feelings of competence and confidence as learners. They are beginning to develop decision-making, communication and life skills, as well as and character values. It is also a time when students develop and acquire attitudes toward school self, peers, social groups and family. Comprehensive developmental school counseling programs provide education, prevention and intervention services, which are integrated into all aspects of children's lives. Early identification and intervention of children's academic and personal/social needs is essential in removing barriers to learning and in promoting academic achievement. The knowledge, attitudes and skills that students acquire in the areas of academic, career and personal/social development during these elementary years serve as the foundation for future success.

Meeting the Challenge

Elementary school counselors are professional educators with a mental health perspective who understand and respond to the challenges presented by today's diverse student population. Elementary school counselors don't work in isolation; rather they are integral to the total educational program. They provide proactive leadership that engages all stakeholders in the delivery of programs and services to help students achieve school success. Professional school counselors align with the school's mission to support the academic achievement of all students as they prepare for the ever-changing world of the 21st century. This mission is accomplished through the design, development, implementation and evaluation of a comprehensive, developmental and systematic school counseling program. ASCA's National Standards in the academic, career, and personal/social domains are the foundation for this work. The ASCA National Model: A Framework For School Counseling Programs (ASCA, 2002), with its data-driven and results-based focus, serves as a guide for today's school counselor who is uniquely trained to implement this program.

Why Elementary School Counselors?

Elementary school years set the tone for developing the knowledge, attitudes and skill necessary for children to become healthy, competent and confident learners. Through a comprehensive developmental school counseling program, counselors work as a team with the school staff, parents and the community to create a caring climate and atmosphere. By providing education, prevention, early identification and intervention, school counselors can help all children can achieve academic success. The professional elementary school counselor holds a master's degree and required state certification in school counseling. Maintaining certification includes on-going professional development to stay current with education reform and challenges facing today's students. Professional association membership enhances the school counselor's knowledge and effectiveness.

Why Middle School Counselors

Today's young people are living in an exciting time, with an increasingly diverse society, new technologies, and expanding opportunities. To help ensure that they are prepared to become the next generation of parents, workers, leaders, and citizens", every student needs support, guidance, and opportunities during adolescence, a time of rapid growth and change. Early adolescents face unique and diverse challenges, both personally and developmentally, that have an impact on academic achievement.

Middle School Students' Developmental Needs

Middle school is an exciting, yet challenging time for students, their parents and teachers. During this passage from childhood to adolescence, middle school students are characterized by a need to explore a variety of interests, connecting their learning in the classroom to its practical application in life and work; high levels of activity coupled with frequent fatigue due to rapid growth; a search for their own unique identity as they begin turning more frequently to peers rather than parents for ideas and affirmation; extreme sensitivity to the comments from others; and heavy reliance on friends to provide comfort, understanding and approval.

Meeting the Challenge

Middle school counselors are professional educators with a mental health perspective who understand and respond to the challenges presented by today's diverse student population. Middle school counselors do not work in isolation; rather they are integral to the total educational program. Why Middle School Counselors?

Middle school students are characterized by rapid physical growth, curiosity about their world and an emerging self-identity. Through a comprehensive developmental school counseling program, counselors work as a team member with school staff, parents and the community to create a caring, supportive climate and atmosphere whereby young adolescents can achieve academic success. Middle school counselors enhance the learning process and promote academic achievement. School counseling programs are essential for students to achieve optimal personal growth, acquire positive social skills and values, set appropriate career goals and realize full academic potential to become productive, contributing members of the world community. The professional middle school counselor holds a master's degree and required state certification in school counseling. Maintaining certification includes on-going professional development to stay current with education reform and challenges facing today's students. Professional association membership is encouraged as it enhances the school counselor's knowledge and effectiveness.

Introduction: Guidelines for Coordination

Description of a Coordinated School Health Program

A coordinated school health program is an effective system designed to connect health with education. This coordinated approach to school health improves students' health and their capacity to learn through the support of families, communities and schools.

Definition

A model that is commonly used for organizing a quality school health program consists of eight interrelated components (Kolbe and Allensworth, 1987). The components have been adapted as follows for Maine:

- **School Nutrition and Food Services:** Food and snacks available at school and at school events that are balanced and nutritious.
- **Physical Education and Physical Activity:** Physical education classes that promote physical fitness, motor skills, social and personal interaction and life-long physical activity.
- **Comprehensive School Health Education:** Kindergarten through high school health education curriculum that is sequential and developmentally appropriate, and that includes instruction and assessment.
- **School Climate:** A school atmosphere supported by programs and policies that nurture positive behavior, assure safety, and promote a feeling of belonging and respect for all students, staff and families.
- **Physical Environment:** Safe and aesthetic physical structures, school grounds and transportation.
- **Youth, Parent, Family and Community Involvement:** Participation of these groups in policy and program development and integration of community providers with schools.
- **School Counseling, Physical and Behavioral Health Services:** Physical health and behavioral health services, including substance abuse services that meet the needs of all students.
- **Health Promotion and Wellness:** Work-site health promotion programs that encourage and support staff in pursuing healthy behaviors and lifestyles.

ASCA Ethical Standards for School Counselors

ASCA's Ethical Standards for School Counselors were adopted by the ASCA Delegate Assembly, March 19, 1984, revised March 27, 1992, June 25, 1998 and June 26, 2004.

Preamble

The American School Counselor Association (ASCA) is a professional organization whose members are certified/licensed in school counseling with unique qualifications and skills to address the academic, personal/social and career development needs of all students. Professional school counselors are advocates, leaders, collaborators and consultants who create opportunities for equity in access and success in educational opportunities by connecting their programs to the mission of schools and subscribing to the following tenets of professional responsibility:

- Each person has the right to be respected, be treated with dignity and have access to a comprehensive school counseling program that advocates for and affirms all students from diverse populations regardless of ethnic/racial status, age, economic status, special needs, English as a second language or other language group, immigration status, sexual orientation, gender, gender identity/expression, family type, religious/spiritual identity and appearance.
- Each person has the right to receive the information and support needed to move toward self-direction and self-development and affirmation within one's group identities, with special care being given to students who have historically not received adequate educational services: students of color, low socio-economic students, students with disabilities and students with nondominant language backgrounds.
- Each person has the right to understand the full magnitude and meaning of his/her educational choices and how those choices will affect future opportunities.
- Each person has the right to privacy and thereby the right to expect the counselor-student relationship to comply with all laws, policies and ethical standards pertaining to confidentiality in the school setting.

In this document, ASCA specifies the principles of ethical behavior necessary to maintain the high standards of integrity, leadership and professionalism among its members. The Ethical Standards for School Counselors were developed to clarify the nature of ethical responsibilities held in common by school counseling professionals. The purposes of this document are to:

- Serve as a guide for the ethical practices of all professional school counselors regardless of level, area, population served or membership in this professional association;
- Provide self-appraisal and peer evaluations regarding counselor responsibilities to students, parents/guardians, colleagues and professional associates, schools, communities and the counseling profession; and
- Inform those served by the school counselor of acceptable counselor practices and expected professional behavior.

A.1. Responsibilities to Students

The professional school counselor:

- a. Has a primary obligation to the student, who is to be treated with respect as a unique individual.
- b. Is concerned with the educational, academic, career, personal and social needs and encourages the maximum development of every student.
- c. Respects the student's values and beliefs and does not impose the counselor's personal values.
- d. Is knowledgeable of laws, regulations and policies relating to students and strives to protect and inform students regarding their rights.

A.2. Confidentiality

The professional school counselor:

- a. Informs students of the purposes, goals, techniques and rules of procedure under which they may receive counseling at or before the time when the counseling relationship is entered. Disclosure notice includes the limits of confidentiality such as the possible necessity for consulting with other professionals, privileged communication, and legal or authoritative restraints. The meaning and limits of confidentiality are defined in developmentally appropriate terms to students.
- b. Keeps information confidential unless disclosure is required to prevent clear and imminent danger to the student or others or when legal requirements demand that confidential information be revealed. Counselors will consult with appropriate professionals when in doubt as to the validity of an exception.
- c. In absence of state legislation expressly forbidding disclosure, considers the ethical responsibility to provide information to an identified third party who, by his/her relationship with the student, is at a high risk of contracting a disease that is commonly known to be communicable and fatal. Disclosure requires satisfaction of all of the following conditions:
 - Student identifies partner or the partner is highly identifiable
 - Counselor recommends the student notify partner and refrain from further high-risk behavior
 - Student refuses
 - Counselor informs the student of the intent to notify the partner
 - Counselor seeks legal consultation as to the legalities of informing the partner
- d. Requests of the court that disclosure not be required when the release of confidential information may potentially harm a student or the counseling relationship.

- e. Protects the confidentiality of students' records and releases personal data in accordance with prescribed laws and school policies. Student information stored and transmitted electronically is treated with the same care as traditional student records.
- f. Protects the confidentiality of information received in the counseling relationship as specified by federal and state laws, written policies and applicable ethical standards. Such information is only to be revealed to others with the informed consent of the student, consistent with the counselor's ethical obligation.
- g. Recognizes his/her primary obligation for confidentiality is to the student but balances that obligation with an understanding of the legal and inherent rights of parents/guardians to be the guiding voice in their children's lives.

A.3. Counseling Plans

The professional school counselor:

- a. Provides students with a comprehensive school counseling program that includes a strong emphasis on working jointly with all students to develop academic and career goals.
- b. Advocates for counseling plans supporting students right to choose from the wide array of options when they leave secondary education. Such plans will be regularly reviewed to update students regarding critical information they need to make informed decisions.

A.4. Dual Relationships

The professional school counselor:

- a. Avoids dual relationships that might impair his/her objectivity and increase the risk of harm to the student (e.g., counseling one's family members, close friends or associates). If a dual relationship is unavoidable, the counselor is responsible for taking action to eliminate or reduce the potential for harm. Such safeguards might include informed consent, consultation, supervision and documentation.
- b. Avoids dual relationships with school personnel that might infringe on the integrity of the counselor/student relationship

A.5. Appropriate Referrals

The professional school counselor:

- a. Makes referrals when necessary or appropriate to outside resources. Appropriate referrals may necessitate informing both parents/guardians and students of applicable resources and making proper plans for transitions with minimal interruption of services. Students retain the right to discontinue the counseling relationship at any time.

A.6. Group Work

The professional school counselor:

- a. Screens prospective group members and maintains an awareness of participants' needs and goals in relation to the goals of the group. The counselor takes reasonable precautions to protect members from physical and psychological harm resulting from interaction within the group.
- b. Notifies parents/guardians and staff of group participation if the counselor deems it appropriate and if consistent with school board policy or practice.
- c. Establishes clear expectations in the group setting and clearly states that confidentiality in group counseling cannot be guaranteed. Given the developmental and chronological ages of minors in schools, the counselor recognizes the tenuous nature of confidentiality for minors renders some topics inappropriate for group work in a school setting.
- d. Follows up with group members and documents proceedings as appropriate.

A.7. Danger to Self or Others

The professional school counselor:

- a. Informs parents/guardians or appropriate authorities when the student's condition indicates a clear and imminent danger to the student or others. This is to be done after careful deliberation and, where possible, after consultation with other counseling professionals.
- b. Will attempt to minimize threat to a student and may choose to 1) inform the student of actions to be taken, 2) involve the student in a three-way communication with parents/guardians when breaching confidentiality or 3) allow the student to have input as to how and to whom the breach will be made.

A.8. Student Records

The professional school counselor:

- a. Maintains and secures records necessary for rendering professional services to the student as required by laws, regulations, institutional procedures and confidentiality guidelines.
- b. Keeps sole-possession records separate from students' educational records in keeping with state laws.
- c. Recognizes the limits of sole-possession records and understands these records are a memory aid for the creator and in absence of privilege communication may be subpoenaed and may become educational records when they 1) are shared with others in verbal or written form, 2) include information other than professional opinion or personal observations and/or 3) are made

accessible to others.

- d. Establishes a reasonable timeline for purging sole-possession records or case notes. Suggested guidelines include shredding sole possession records when the student transitions to the next level, transfers to another school or graduates. Careful discretion and deliberation should be applied before destroying sole-possession records that may be needed by a court of law such as notes on child abuse, suicide, sexual harassment or violence.

A.9. Evaluation, Assessment and Interpretation

The professional school counselor:

- a. Adheres to all professional standards regarding selecting, administering and interpreting assessment measures and only utilizes assessment measures that are within the scope of practice for school counselors.
- b. Seeks specialized training regarding the use of electronically based testing programs in administering, scoring and interpreting that may differ from that required in more traditional assessments.

Ethical behavior among professional school counselors, association members and nonmembers, is expected at all times. When there exists serious doubt as to the ethical behavior of colleagues or if counselors are forced to work in situations or abide by policies that do not reflect the standards as outlined in these Ethical Standards for School Counselors, the counselor is obligated to take appropriate action to rectify the condition. The following procedure may serve as a guide:

1. The counselor should consult confidentially with a professional colleague to discuss the nature of a complaint to see if the professional colleague views the situation as an ethical violation.
2. When feasible, the counselor should directly approach the colleague whose behavior is in question to discuss the complaint and seek resolution.

3. If resolution is not forthcoming at the personal level, the counselor shall utilize the channels established within the school, school district, the state school counseling association and ASCA's Ethics Committee.
4. If the matter still remains unresolved, referral for review and appropriate action should be made to the Ethics Committees in the following sequence:
 - state school counselor association
 - American School Counselor Association
5. The ASCA Ethics Committee is responsible for:
 - educating and consulting with the membership regarding ethical standards
 - periodically reviewing and recommending changes in code
 - receiving and processing questions to clarify the application of such standards; Questions must be submitted in writing to the ASCA Ethics chair.
 - handling complaints of alleged violations of the ethical standards. At the national level, complaints should be submitted in writing to the ASCA Ethics Committee, c/o the Executive Director, American School Counselor Association, 1101 King St., Suite 625, Alexandria, VA 22314
